

WHAT WE NEED TO QUOTE YOU.

Send what you have. With these six things a first price takes one email rather than three. If something is missing, the free site survey measures it for you.

WHAT	DETAIL WE NEED	YOUR FIGURES
Building dimensions	Length, width and clear height under the lowest obstruction; column grid; door positions	
Pallet detail	Pallet size (UK 1200×1000, Euro 1200×800, other), loaded height, heaviest weight, overhang, condition	
Truck list	Type (counterbalance, reach, VNA, articulated), mast lift height, fork length, guidance fitted	
Stock profile	Number of SKUs and pallets per SKU. This decides the system.	
Rotation rule	FIFO (first in, first out), LIFO (last in, first out) or either; is it a regulatory requirement?	
Constraints	Floor condition, sprinklers, temperature, live operation, lease end, existing racking (make and photos)	

Email to sales@pallettrackingwales.co.uk or call 07814 627770. The site survey is free and carries no obligation: you keep the measured drawing, CAD layout and capacity figure either way.
